

Brain Health Webinar Series

The purpose of this series is to address Brain Health and related STEM in an educational context. The intended audience includes Primary and Post Primary Teachers, Special Needs Assistants, parents and the wider community.

Webinar Dates

1. Strategies for Maintaining Neurological Health - 13th March
2. The Human Brain - Structure, Function and Genetics - 20th March
3. **Epilepsy in an Educational Context - 27th March**
4. Concussion and Compression in an Education Context - 25th April

All webinars start at 7pm

Session 3 - Epilepsy in an Educational Context

Learning Outcomes

1. Participants will deepen their understanding of the Epilepsy in a general sense, including symptoms, diagnostics, treatments, trends and patterns.
2. Participants will learn how Epilepsy may affect children's lives in school, both academically and socially.
3. Participants will learn some practical strategies to assist them in helping young people with Epilepsy.

Hosted by ESCI. (Education Support Centres of Ireland)
